CORPORATE OVERVIEW

Volans helps Government and Commercial organizations achieve their vision with the use of Technology. Our staff includes seasoned professionals with extensive experience in various industries including Government, Finance, Healthcare, Media and Mortgage. Our services range from advising IT leadership on digital transformation to implementing high quality, end-to-end software solutions On Premise and Cloud.

KEY DIFFERENTIATORS

- **Inherently Agile** - Volans has been committed to Lean principles and practices since its inception. Adopting Agile and DevSecOps was a natural and easy transition.

- **Relentless Focus on Business Value** - Agility is eventually about delivering highest possible business value. We work closely with Business stakeholders to not just understand requirements but their strategic vision.

- **Satisfied Employees** - Our consultants are our most valuable asset and we ensure their satisfaction by fostering environment that promotes better work life balance. We help them achieve technical proficiency by providing education assistance, professional training and industry certifications.
